Size of area: 143 m²

Impact: municipal

Total costs: EUR

Source per every institution

- EU funds: 160 201,23 EUR
- regional: 315 558,22 EUR

II. TYPOLOGY

1. Improved condition & quality of the public space between the blocks of flats.

Záhradná ulica reconstruction in Pezinok town is based on a need to find a solution and deal with unacceptable technical state of roads, sidewalks, driveways, ramps and parking lots to increase the traffic safety and traffic fluency, increase safety of pedestrians, to improve organisation all over the area and increase the static traffic capacity.

2. Improved support for the development of small business operators in the area of blocks of flats.

The reconstruction includes exchange of lights, railings and bins, it includes revitalisation of green areas, cutting down ill trees, planting young ones and removal of scrubland vegetation. It also brings some restrictions during the reconstruction which will affect traffic fluency and parking, and will bring third party to the area to guarantee the safety but only temporarily till work is finished. Realisation of this reconstruction is important for local community because it will make traffic safer, better organised, with improved parking areas and rest areas.

3. Improved attractiveness of the architecture of the socialist buildings.

The reconstruction includes exchange of lights, railings and bins, it includes revitalisation of green areas, cutting down ill trees, planting young ones and removal of scrubland vegetation. It also brings some restrictions during the reconstruction which will affect traffic fluency and parking, and will bring third party to the area to guarantee the safety

but only temporarily till work is finished. Realisation of this reconstruction is important for local community because it will make traffic safer, better organised, with improved parking areas and rest areas.

4. Improved involvement of the local community in events organized in its quarter.

Realisation of this project will strengthen territorial integrity of the town and road reconstruction will improve the accessibility of all areas around to motorists, cyclists, pedestrians, and all others.

5. Identified new functions for structures from the era of socialism in 1945 - 1989).

Realisation of this reconstruction will improve local people life quality from two aspects: 1) Improvement of traffic in the area in general, including new lights, sidewalks railings, driveways, parking lots and bins 2) Improvement of green areas and environment by planting new trees and shrubs, and by creating new rest zones with benches

III. SUPPLEMENT

Reconstruction of Záhradná ulica (Garden St.) in Pezinok town is based on the need to solve an unsatisfactory technical condition of pavements, sidewalks, driveways, ramps, parking lots and other hard surfaces and the need to increase the safety and traffic fluency, to improve the organisation and to increase the capacity of static traffic.
